# Sustainable SODECA

## Committed to the fight against climate change

We have calculated, reduced, and verified our carbon footprint, achieving a 36.45% reduction between 2015 and 2023

This achievement has earned us the CALCULO + REDUZCO seals, awarded by the Ministry for the Ecological Transition and the Demographic Challenge

Sustainable solutions drive our business strategy. We produce with clean energy, reduce emissions, and focus on waste valorization, reuse, and recycling

## ISO14001

### Certification

The environmental management system at SODECA's headquarters is certified with ISO 14001

€ 1M€

### Annual investment in sustainability

13 strategically located subsidiaries, with a global vision

# Sustainable production

We strive to minimize the environmental impact of our processes by improving energy efficiency and optimizing waste management

Our environmental sustainability strategy is structured around four key areas of focus

**Circular Economy**

**Environment**

**Sustainable Production**

**Local Development**

# Sustainable commitment

SODECA has been awarded a bronze medal by a prestigious sustainability evaluation entity. After assessing over 130,000 companies globally, SODECA ranks among the top 27% in terms of sustainability

At SODECA, we are committed to the 2030 Agenda and actively support the Sustainable Development Goals (SDGs) by aligning our objectives with the most relevant SDGs for our field of action.

We promote 9 of the 17 SDGs and contribute to 24 of their specific targets, fostering sustainable development while maintaining a balance between economic, social, and environmental aspects.

In addition, we have developed a Sustainability Plan for 2023-2030 to establish clear action lines that drive continuous improvement in sustainability.

**SUSTAINABLE DEVELOPMENT GOALS**

# Projects Department

SODECA has a Projects Department made up of specialized technicians who provide personalized advice from the initial phase of the project, offering a comprehensive technical study and relying on the most advanced design tools.

Each solution is designed to comply with current regulations and legislation

## Comprehensive service

### Custom design

Solutions tailored to the specific needs of each project

### Technical evaluation of projects

Detailed requirements analysis to ensure that the proposed solutions are functional, efficient, and comply with current regulations

### Technical support during implementation

We recommend specialized installers and provide technical advice throughout the installation process.

### Supervision

We ensure that the system operates at peak performance from the start
